19th Clinical Challenges Forum

University Hospitals Coventry and Warwickshire

Theme: Data –driven surgical research

Friday 5th December 2025
1pm - 3:30pm

Venue: WMG international Digital Laboratory Boardroom, University of Warwick CV47AL

The Institute for Applied & Translational Technologies in Surgery (IATTS) kindly invites you to the 19th meeting of the Clinical Challenges Forum, hosted by Warwick Manufacturing Group (WMG). It will update on current research being undertaken and include an open forum to discuss new projects and ideas; followed by optional tours of relevant WMG Facilities and CT Facility.

- **Dr Soyeon Kim** –Human Machine Interaction design for better user experience and safety.
- **Dr Linda Wanika** – Use of hybrid mechanistic and AI based tools for the detection or prediction of adverse events
- **Maisie McCormick** – Will speak on a platform she designed called Collaborate for research

If you are currently planning or undertaking clinical research within UHCW and would like to be involved, please email **IATTS@uhcw.nhs.uk**
If you wish to join the optional tours, **please pre-book with us by Friday 28th November**. Depending on demand, the tours may extend beyond 3.30pm.
We look forward to meeting with you and to developing new research projects and collaborations!
